Experienced WordPress developer with 3+ years of expertise in planning, designing, developing, testing, and deploying websites. Successful freelance background with a passion for continuous learning and exploring new technologies.

### **SKILLS**

- Basic understanding of C, C++, JAVA, Python, R
- HTML,CSS,JAVASCRIPT,PHP, & WordPress.
- Migration of site, backups, and different hosting tools.
- React, Components, Packages, Jsx
- State handling in React, Redux
- Hooks, Rendering, Typescript, Reducer

### **WORK EXPERINCE**

#### **Walstar Technology, Kolhapur**

**Web Developer** | [Oct-2020] - [Oct-2021]

- Developed and maintained dynamic, responsive websites using HTML, CSS, and JavaScript, ensuring seamless user experiences across various devices and browsers.
- Collaborated with UI/UX designers to implement visually appealing and intuitive user interfaces, consistently meeting design specifications and project deadlines.
- Utilized PHP to create robust and scalable back-end functionalities, enabling efficient data processing and seamless integration with databases.
- Expertly customized WordPress themes and plugins to meet specific project requirements, optimizing website performance and enhancing user interactivity.
- Conducted thorough testing and debugging to identify and resolve issues, ensuring the delivery of error-free and high-quality code.
- Implemented SEO best practices to improve website visibility and enhance organic search rankings, resulting in increased website traffic and user engagement.
- Actively participated in team meetings and provided valuable insights to drive continuous improvement and innovation within the development process.
- Assisted in training and onboarding new team members, fostering a collaborative and knowledge-sharing work environment.

## **Freelance, Kolhapur**

WordPress Developer & React UI Specialist | [Oct-2021] - Present

- Collaborate with clients to understand project requirements, scope, and objectives, ensuring clear communication and alignment throughout the development process.
- Utilize WordPress to design, develop, and maintain custom websites, themes, and plugins that cater to clients' specific branding and functionality needs.
- Implement SEO best practices and optimize websites for speed and performance, resulting in enhanced user experiences and improved search engine rankings.
- Leverage React to create captivating user interfaces, employing modern UI design principles to craft intuitive and engaging web applications.
- Develop responsive and mobile-friendly websites to ensure seamless user experiences across various devices and screen sizes.
- Conduct thorough testing and debugging to identify and resolve issues, guaranteeing the delivery of error-free and high-quality code.
- Actively research and adopt the latest industry trends and best practices, integrating cutting-edge technologies to provide innovative solutions for clients.
- Manage multiple projects simultaneously, meeting tight deadlines and exceeding client expectations.
- Collaborate with other developers, designers, and stakeholders to achieve project milestones and deliver cohesive final products.

## **PROJECTS**

Client website URLs are confidential, so I've prepared demo projects to demonstrate my abilities. They are deployed and available for review. Feel free to take a look!

### **Calculator Using Class Component in React**

Designed and implemented a comprehensive calculator application with all essential arithmetic functionalities. Additionally, successfully deployed the project using Vercel for seamless accessibility. (<https://github.com/Prathmeshkusumbe/React-Calculator>).

### **Shopping Cart Using Redux**

The primary objective of this project was to gain practical experience in utilizing Redux within the app. It features a homepage displaying products in a row-column layout, allowing users to add items to their cart. The cart functionality includes the ability to increment or decrement product quantities and delete items. Additionally, the application updates the subtotal and total price in real-time based on user preferences.

### **Crypto Coins & its data**

The purpose of this project was to implement data fetching and utilize the useEffect hook within the app. The home page displays a list of Crypto coins in a row and column layout. Clicking on any coin leads to a single coin view where real-time data for that specific coin is displayed. Additionally, the application shows charts, low and high values, and other metadata. Users can view the chart in various timelines and currencies. (<https://github.com/Prathmeshkusumbe/React-Crypto-coin>).

## **COURCSES & CERTIFICATE**

- ReactJS - Basics to Advanced (edyoda.com)
- WodPress and Docker certified.
